

Answers to Questions 1 – 6 can be found in your class notes or [course notes](#).

7. 2. $\langle \text{signed int} \rangle \rightarrow (+|-)\{\langle \text{digit} \rangle\}^+$

8.

1. The invalid ones are marked with \times .

8ABC (\times) CS316 CS316_ (\times) CS316_ABCX
 _CS316 (\times) CS316__ABC (\times) CS316_987 CS316_ABC_32A
 CS316_543_7B5 CS316_A_ (\times)

2. The following is one of possible correct grammars.

$\langle \text{id} \rangle \rightarrow \langle \text{letter} \rangle \langle \text{rest of id} \rangle$

$\langle \text{rest of id} \rangle \rightarrow \epsilon \mid \langle \text{letter} \rangle \langle \text{rest of id} \rangle \mid \langle \text{digit} \rangle \langle \text{rest of id} \rangle$

$\langle \text{extended id} \rangle \rightarrow \langle \text{id} \rangle \langle \text{rest of extended id} \rangle$

$\langle \text{rest of extended id} \rangle \rightarrow \epsilon \mid \text{"_"} \langle \text{letters and digits} \rangle \langle \text{rest of extended id} \rangle$

$\langle \text{letters and digits} \rangle \rightarrow \langle \text{letter} \rangle \mid \langle \text{digit} \rangle \mid \langle \text{letter} \rangle \langle \text{letters and digits} \rangle \mid \langle \text{digit} \rangle \langle \text{letters and digits} \rangle$

9. The invalid ones are marked with \times .

.e1 (\times) .2e (\times) .2e3 .45E-32 3.2145e10 768.43 2709 (\times)
 2709. (\times)
 -.562e2 +34E+5 (\times) -65.67 75647.74653e- (\times) 756.65e-7564
 +.64-8 (\times)

10.

1.

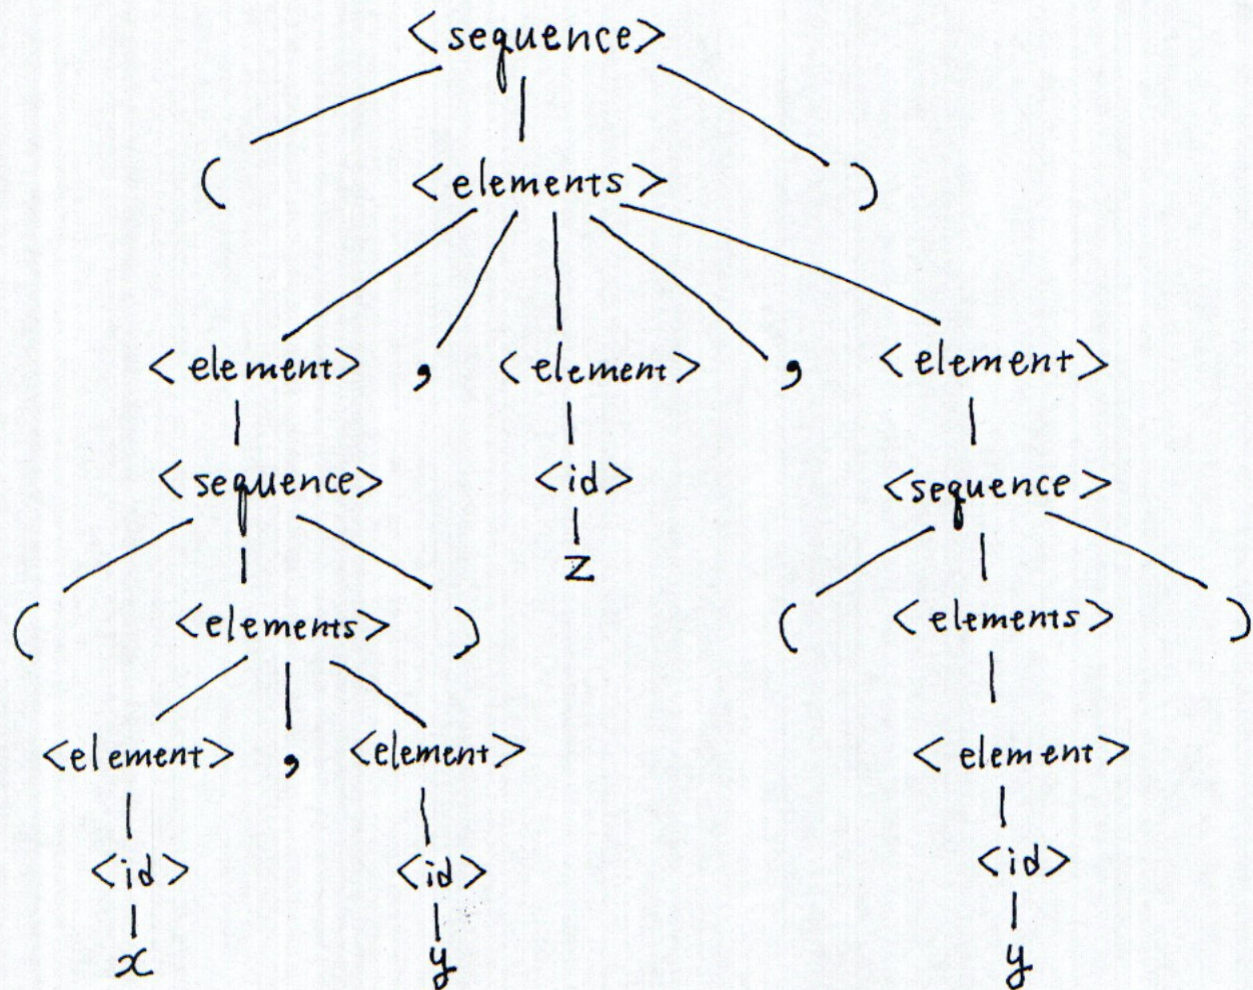

() invalid

(xyz) valid, parse tree not shown

(x, y, z) valid, parse tree not shown

((x, y), z, (y)) valid

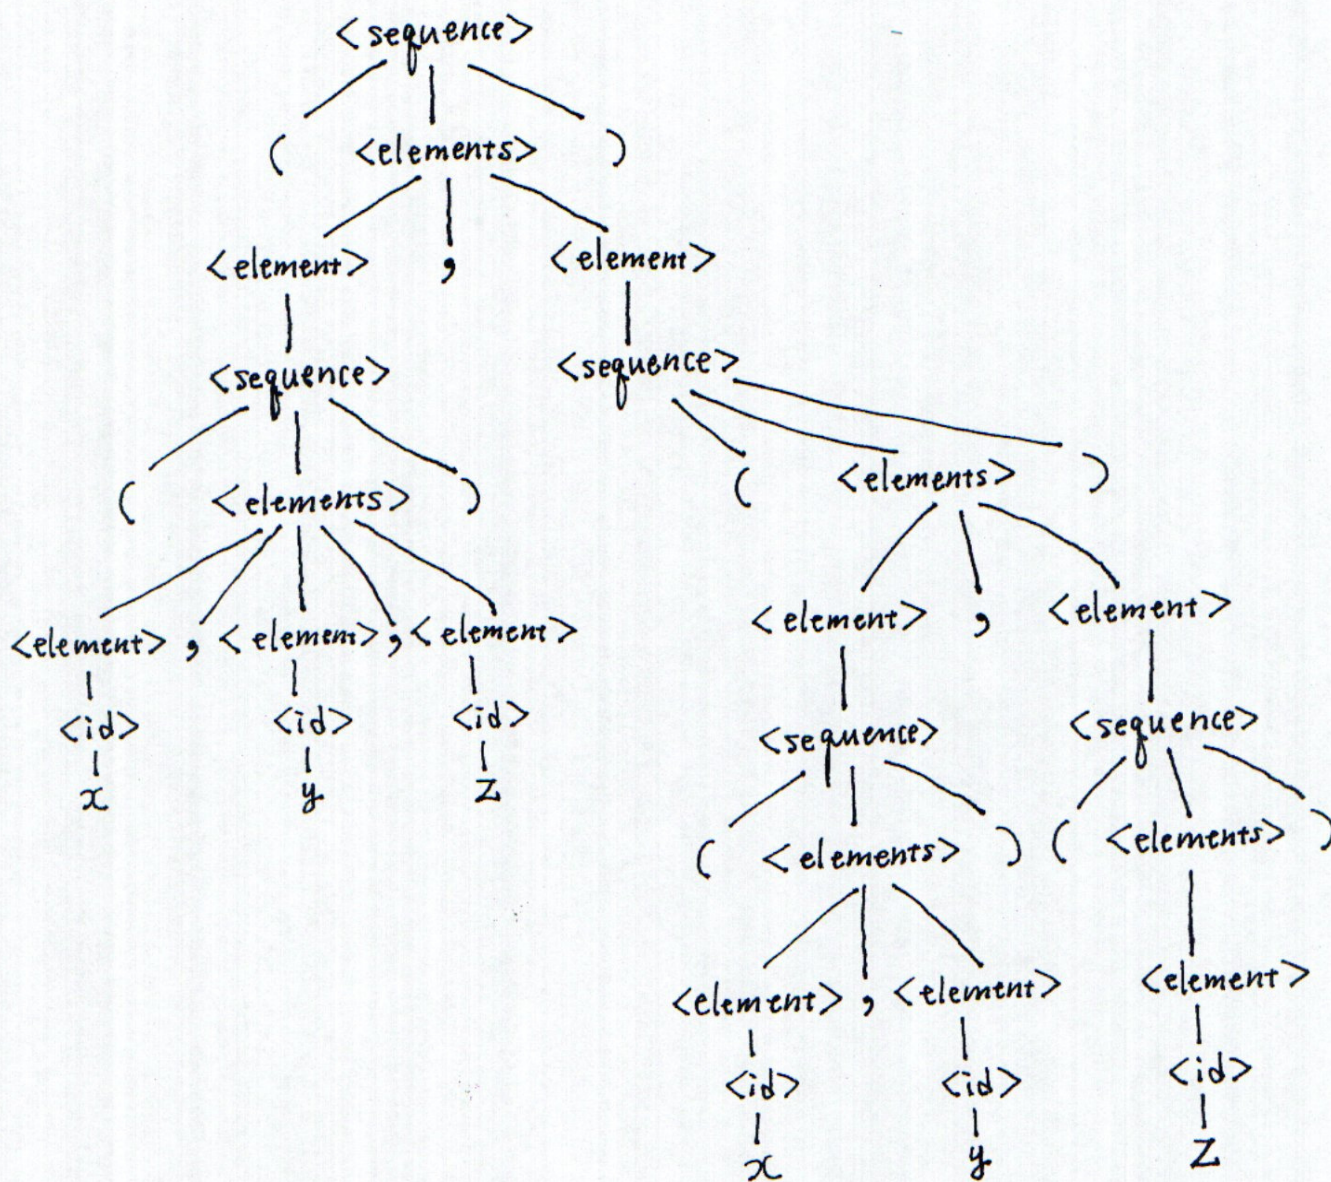

The parse tree for $((x, y), z, (y))$

$(x)(y)$ invalid

$((x, y, z), ((x, y), (z)))$ valid

The parse tree for $((x, y, z), ((x, y), (z)))$

$x) y) z$ invalid

2.

$\langle \text{elements} \rangle \rightarrow \langle \text{element} \rangle \mid \langle \text{element} \rangle , \langle \text{elements} \rangle$

11.

$\{ a; b; c; \}$ valid, parse tree not shown

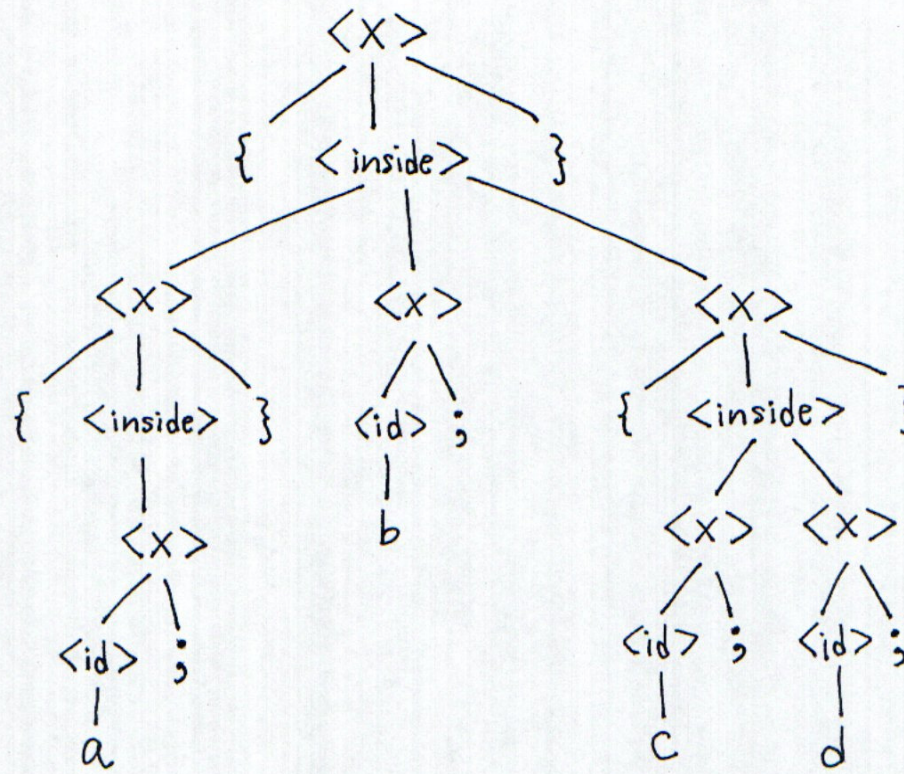

$\{ a \ b \}$ invalid

$\{ a; \{ b; c; \} \}$ valid, parse tree not shown

$\} a; b; \{$ invalid

{ { a; } b; { c; d; } } valid

The parse tree for { { a; } b; { c; d; } }

12.

abc valid, parse tree not shown

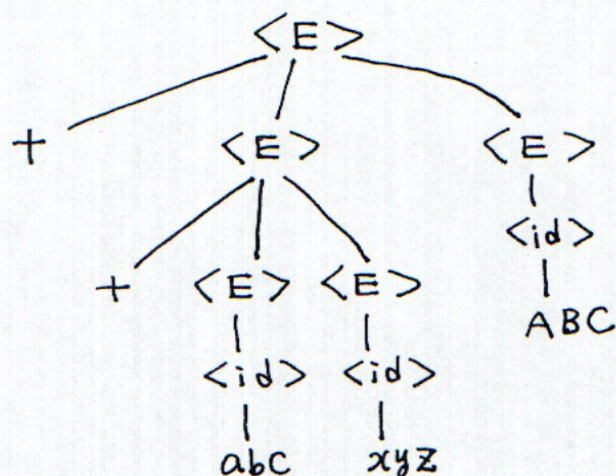

+ abc xyz valid, parse tree not shown

+ + abc xyz ABC valid, parse tree below

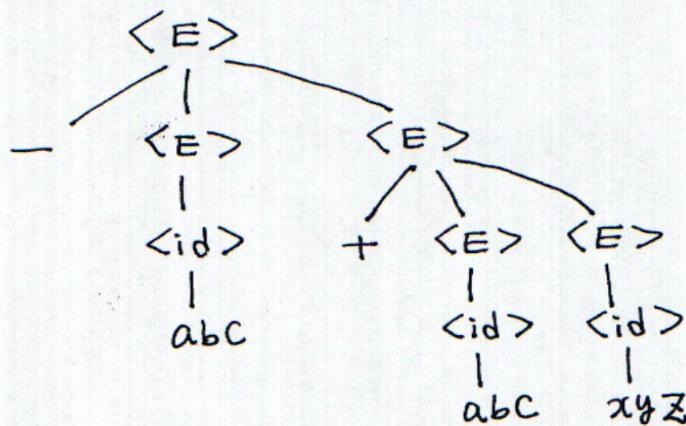

- abc + xyz invalid

- abc + abc xyz valid, parse tree below

The parse tree for $+ + abc\ xyz\ ABC$

The parse tree for $- abc + abc\ xyz$

13.

abc valid, parse tree not shown

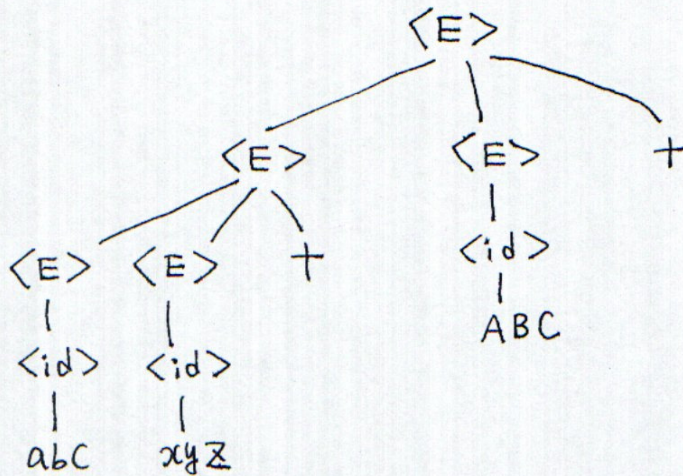

abc xyz + valid, parse tree not shown

abc xyz + ABC + valid, parse tree below

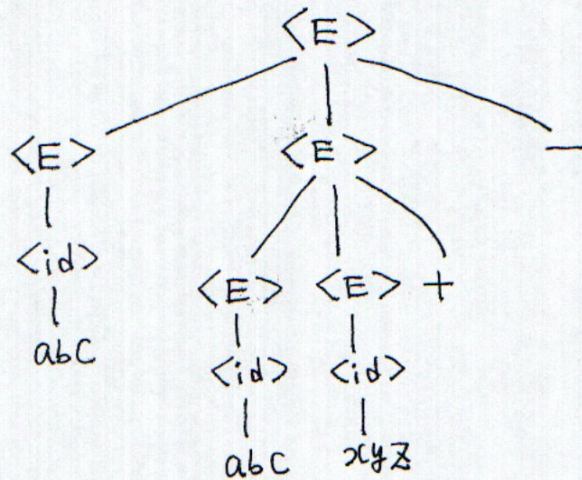

abc - xyz + invalid

abc abc xyz + - valid, parse tree below

The parse tree for $abc\ xyz + ABC +$

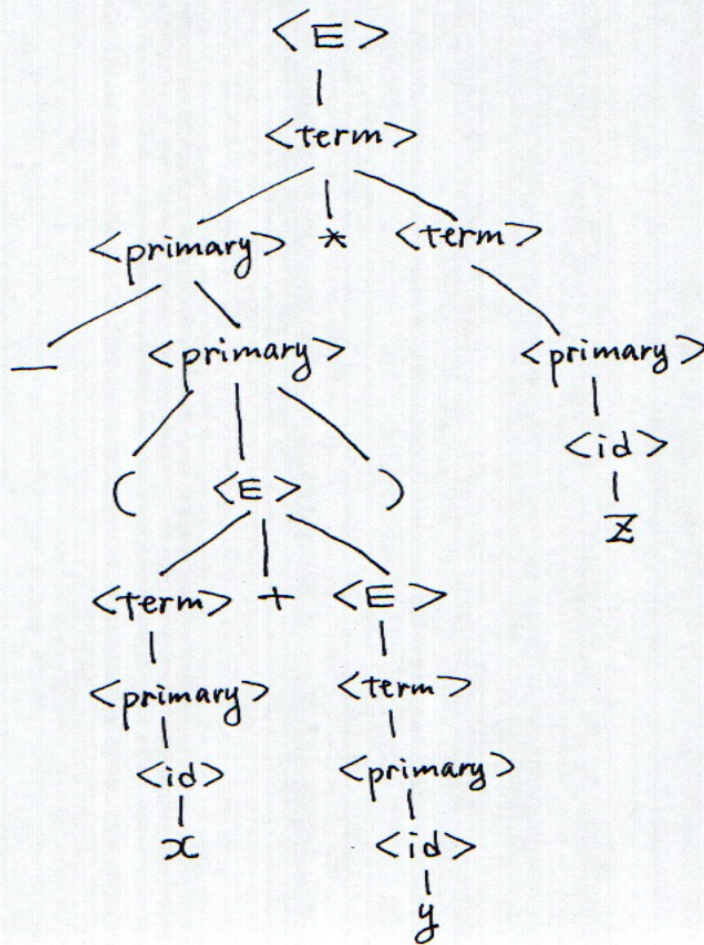

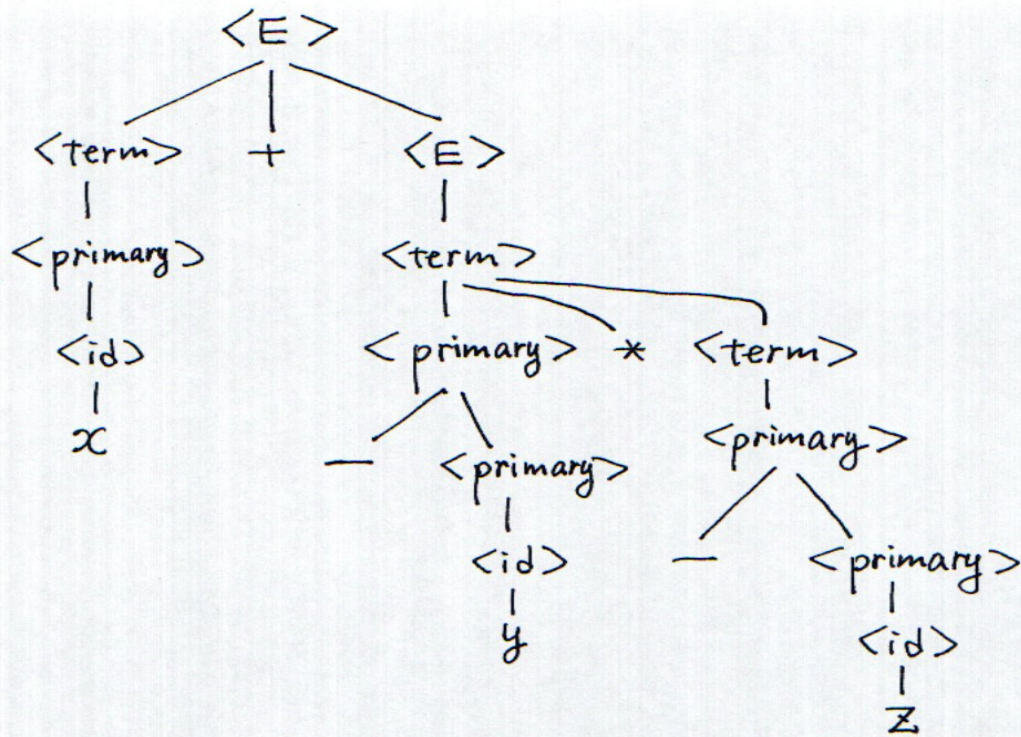

The parse tree for $abc\ abc\ xyz + -$

14.

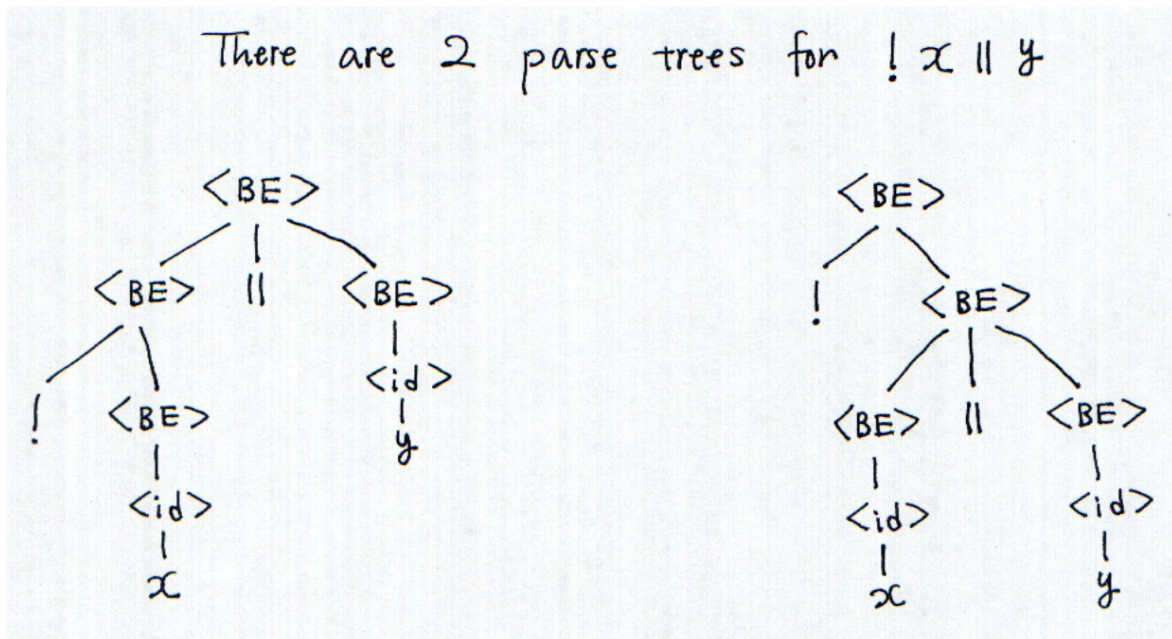

1. The parse trees for " $x + - y * - z$ " and " $-(x + y) * z$ " are shown.

2 & 3. Discussed in class.

15.

1.

2. There are 5 parse trees: one with "&&" at the root, two with the 1st "||" at the root, two with the 2nd "||" at the root.

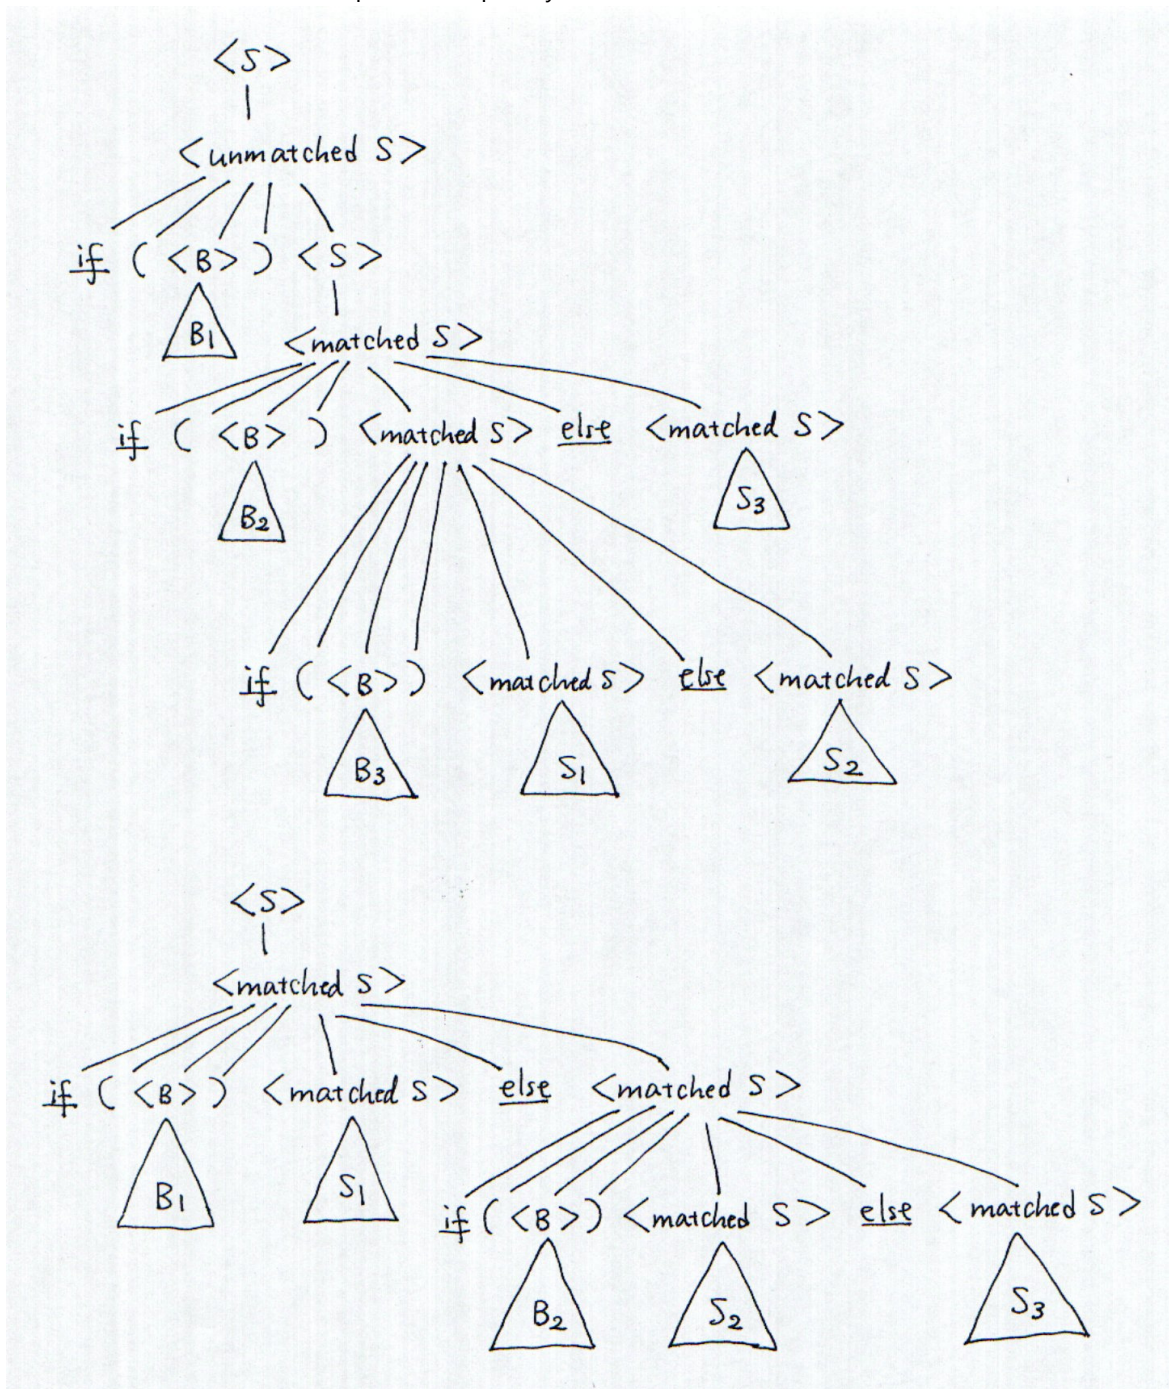

3. Both Q1 and Q2 show the existence of a string of terminals that has more than one parse tree.

4.

$\langle BE \rangle \rightarrow \langle term \rangle \{ "||" \langle term \rangle \}$
 $\langle term \rangle \rightarrow \langle primary \rangle \{ "&&" \langle primary \rangle \}$
 $\langle primary \rangle \rightarrow \langle id \rangle | "(" \langle BE \rangle ")" | ! \langle primary \rangle$

16. Discussed in class.

17.

18. Answer can be found in your class notes or [course notes](#).
